Education

Vignan's University, Andhra Pradesh

2023 – Present

B.Tech in Computer Science and Engineering (AIML)

CGPA: 7.95

Expected Graduation: 2027

Technical Skills

- **Programming:** Python, Java, C
- **Computer Science:** Data Structures & Algorithms, OOP, OS Basics, DBMS
- **Machine Learning:** Scikit-learn, Supervised Learning, Feature Engineering, Model Evaluation
- **Deep Learning:** CNNs, Transfer Learning, Model Optimization (basic)
- **Generative AI:** LLMs, Prompt Engineering (RAG), Hugging Face (basic)
- **AI Domains:** Natural Language Processing (NLP), Computer Vision
- **Big Data & Data Engineering:** Hadoop, PySpark
- **Databases:** MySQL
- **Web Basics:** HTML, CSS, JavaScript
- **Tools:** Git, GitHub, Jupyter Notebook

Projects

Fraud Detection System — Python, Machine Learning

- Developed supervised ML models to detect fraudulent financial transactions from structured datasets.
- Addressed class imbalance using resampling techniques and evaluated models using precision, recall, and F1-score.
- Designed a scalable pipeline for preprocessing, training, and evaluation of multiple models.

Movie Recommendation System — Python, Machine Learning

- Built a content-based recommendation system using cosine similarity and vector representations.
- Implemented ranking logic to generate personalized recommendations.
- Simulated a real-world recommendation pipeline with preprocessing, feature extraction, and inference stages.

Skin Disease Detection System — Python, Deep Learning

- Implemented a CNN-based image classification model for disease detection (Computer Vision use case).
- Applied image preprocessing, augmentation, and transfer learning techniques.
- Optimized model performance using validation metrics and tuning strategies.

Certifications

- Introduction to Large Language Models — Simplilearn (Google Cloud)
- Generative AI for Beginners — Simplilearn

Additional Information

- Strong foundation in data structures, algorithms, and system-level problem solving.
- Hands-on experience with ML and DL model development, evaluation, and optimization.
- Actively exploring Generative AI, LLM fine-tuning concepts, and multimodal AI systems.
- Interested in building scalable AI systems and production-ready ML pipelines.
- Seeking Machine Learning / AI roles to apply deep learning and GenAI in real-world systems.
